
Control Plane (Server-Side)
Graph + Constraints
• Topology & features
• Memory limits
• Bandwidth & latency
• Privacy policies
Placement Governor
Cost Model
Feasibility Check
Placement Decision
Placement Manifest (Execution Plan)
✓ Server / Edge placement
✓ Data partition & cache plan
✓ Runtime configuration
Mode-Aware Executors
Server-Centric
Hybrid
Edge-Local
Feedback (metrics, state)
Data Plane (Server–Edge Substrate)
Execution Plane (Distributed)
Server-Centric
• Full computation on server
• Ship mini-batches from server
Hybrid
• Split computation
• Cache features at edge
Edge-Local
• Train locally on edges
GNN Training on Graphs
